Discussion with [] Chapter VI Coordinator

25X1

1. In conversation with [] Chapter VI SovBloc Coordinator, he indicated desires of the Economic Area, and specifically [] to obtain the production allocations for Section 62-D, Electric Power, and Section 63-F, Construction Materials, which are presently done by the Army engineers. [] said that difficulties of getting production coordination on these two sections had caused considerable delay in ORR production of Chapter VI elements, and further, that the manner in which these sections were prepared by Army was not in consonance with the way the rest of the sections had been prepared.

25X1

2. I indicated to [] that I would informally look into the matter, although I didn't have any hopes of getting re-allocation of these two sections to ORR.

25X1

3. As a substitute I suggested to [] the possibility of working out with the engineers an ad hoc arrangement on these subsections on which they found difficulty or were anticipating the long delays in production, permitting ORR to do the job and having the subsections thus produced reviewed by the engineers.
